

## Foam extinguisher with concentrate cartridge

**EcoLine 06 FC 27A 183B 0/60°C  
(rechargeable extinguisher)**

**EcoLine 09 FC 34A 233B 0/60°C  
(rechargeable extinguisher)**

### Description

#### Economical, effective, 'Made in Germany'

Wherever Class A and B fire hazards exist (solid and liquid fire loads) and where high-quality fire extinguishers should be present, both of these foam extinguishers from the NEURUPPIN EcoLine are right where they should be. The benefits of these two rechargeable extinguishers are their favorable price-performance ratio and their low cost of maintenance cost, achieved through having separate foam cartridges. Above all, it is their Made in Germany quality and their superb extinguishing properties that make an investment in EcoLine appliances such a sound decision.

#### Great fire-fighting power, long maintenance intervals

With their carefully thought out design, these EcoLine fire extinguishers, with 6 and 9 liters of extinguishant respectively are easy to handle and can be operated easily, even by untrained users – pull out the retaining pin, press the pushbutton, direct the pistol grip at the fire, then actuate the handle. The foam extinguishant tackles fires efficiently and effectively. Since the foam extinguishant for fighting B-class fires is kept in a separate container, the extinguishant only needs to be replaced every 6 years, significantly reducing their maintenance and disposal costs.

### Applications

- Fire-fighting of materials in fire classes A and B (solid or liquid substances)
- Manufacturing and processing industry
- Workshop areas, trade, commerce
- Office premises
- Sales facilities
- Warehouses and logistics
- Cinemas, theaters and other performance spaces
- Administration buildings
- Medical facilities
- Educational institutions
- Gastronomy
- Domestic

### Special advantages

- **Powerful and economical** – Made in Germany quality and superlative price-performance ratio
- **Self-explanatory function** – intuitive and easy to operate
- **Long spraying times** – for effective fire-fighting, even by untrained users
- **No impaired visibility when fighting a fire** – great advantage compared to powder extinguishers
- **Proven and safe recharging technique** – with pushbutton and extinguisher pistol with a pressure-relief function
- **Parkable extinguisher pistol** – good dispensing action for multiple brief bursts when fighting a fire
- **Complies with DIN EN 3 specifications** – for use on electrical systems (up to 1000 V, 1 m minimum distance)
- **Simple and low-cost maintenance** – with large container opening, separate storage of extinguishant in concentrate cartridge as well as repeat components
- **Low cost of maintenance** – service life of the extinguishant extended to 6 years
- **Including corrosion inhibitor** – Steel tank with high-quality powder coating (TGCI-free) and an additional 1 mm thickness of PE internal coating
- **Wall bracket and base ring** – available as accessories that fit perfectly
