

Powder Extinguisher

**PG 6 AS -30 °C to 60 °C
(cartridge-operated extinguisher)**

**PG 9 AS -30 °C to 60 °C
(cartridge-operated extinguisher)**

**PG 12 AS -30 °C to 60 °C
(cartridge-operated extinguisher)**

Description

With powder power against fire classes A, B, and C

With tremendous suppression power, NEURUPPIN's AS series powder extinguishers fight fires of an extremely diverse range of materials in fire classes A, B, and C. The high-quality, robust and durable extinguishers "Made in Germany" have 6 kg, 9 kg or 12 kg of the highly potent and hydrophobic powder Neutrex Super from NEURUPPIN – its fast action is down to the anticatalytic effect. With high ratings, long operation times, self-explanatory functionality, and comparatively low weight, they allow even inexperienced users to effectively fight fires.

High quality for a high level of fire protection

The high quality of PG AS cartridge-operated extinguishers extends all the way from the resistant, pressure-tested and powder-coated steel cylinder made by NEURUPPIN with an internal CO₂ compressed gas steel cylinder to the corrosion-resistant compact fitting and the rotatable pistol. Activation by means of a button enables simple, intuitive operation and the large cylinder opening allows uncomplicated service work to be carried out. The pistol can be switched off at any time during use. This enables targeted, intermittent suppression for a high degree of effectiveness. A stable wall bracket is included in the standard scope of delivery to keep the extinguishers optimally ready for use.

Applications

- Fire fighting of materials in fire classes A, B, and C
- Building management
- Industrial plants
- Commercial premises and workshops
- Warehouses, logistics and transport
- Workshops
- Petrol stations
- Heating systems
- Agriculture
- Waste management

Features

- Sudden suppression effect – due to the anticatalytic effect of the Neutrex Super powder from NEURUPPIN
- High suppression performance – long operation times, high ratings and easy operation enable even inexperienced users to carry out effective suppression
- Self-explanatory function – proven and safe operation with button
- Good dosability – rotatable pistol (with overpressure safety function) can be turned off at any time
- Easy to set up – comparatively low weight and ergonomically optimised design
- Very economical – easy to service due to large cylinder opening, repeat parts and well thought out unit design
- Good price-performance ratio and Made in Germany
- Insensitive to cold – can be used at ambient temperatures from -30 °C to +60 °C
- Meets DIN EN 3 specifications – for use against electrical installations (up to 1000 V, 1 m minimum distance)
- Corrosion protection included – 100 % pressure-tested steel cylinder with high-quality plastic coating
- Wall bracket included – for optimum placement
- Accessories available – protective boxes, brackets, signs and more optionally available
